PROCEEDINGS OF THE INDIAN ACADEMY OF SCIENCES

SECTION A

Vol. 83, January–June 1976

AUTHOR INDEX

Abdel Kerim M Fawzy
Investigation of the electronic absorption spectra of some pyridine derivatives iodine complexs 231

Balasubramanian R
The place of an identity of Ramanujan in prime number theory 156
Bansal J L
Temperature distribution in a laminar plane wall jet 1
Bhatnagar Prem Swarup
Radiation from non-planar dipole antenna in weakly ionised plasma with displaced feed points 81
Bhattacharyya S P
Stability of an infinite horizontal layer of fluid with a spatial heat source in the presence of a magnetic field 11
Biswas Paritosh
Large deflection of a heated semi-circular plate under stationary temperature distribution 167

Channabasappa M N
Flow of viscous stratified fluid of variable viscosity past a porous bed 145

Datta S
Large deflection of a semi-circular plate on elastic foundation under a uniform lead 21
Dutt Jatinder
see Kalia Ramesh Kumar 119

El-Fotouch Abou F A
see Abdel Kerim M Fawzy 231

Gaur Madhukar
see Tewari T N 65
Ghoshal Abha
see Ghoshal K Sudhanshu 258
Ghoshal K Sudhanshu
Finite difference method of solution of unsteady magnetic hydro dynamic boundary layer equations in a natural convection 258
Gopalan M A
Viscous flow and temperature distribution in rotating annulus with suction and injection 126
Goyal R N
see Malik U Wahid 98
Goyal S P
see Vasishta S K 41

Hartland S
see Ramakrishnan S 107

Jain S K
see Bhattacharyya S P 11

Kalia Ramesh Kumar
Amperometric titrations using the tubular graphite electrode. Development of an automatic technique 119
Khanna Vijay
see Kalia Ramesh Kumar 119
Koul C L
see Raina R K 33

Laddha G S
see Swaminathan G 101

Mailliet K
see Ramakrishnan S 107
Malik U Wahid
Application of Hammett equation to aryl-azopyrazoles 98
Misro Prafulla Kumar
see Panigrahi G P 211
Mostafa A
see Abdel Kerim M Fawzy 231

Nasr A Mostafa
Convex hull and extreme points of two families of univalent functions 138
Nath G
see Sundaram K M 50, 188

Pachpatte B G
Behavioral relationships between two nonlinear integrodifferential equations 219
Panigrahi G P
Structure-reactivity relationship in the oxidation of aryl aliphatic ketones by Ce^{IV} 211
Phatak G M
Catalytic effects in reactions of chromium (III) —Part II : The role of excess ligand buffer in complexation of Cr(III) with some aminopoly-carboxylic acids 243

Raina R K
Some inequalities involving the Fox's H-function 33
Rajagopal C T
On the relation of Cesàro summability to generalized ($F_{a,a}$) summability 175
Ramachandra K
see Balasubramanian R 156
Ramakrishnan S
Measurement of surface and interfacial tension from the maximum pressure in sessile and pendant bubbles and drops 107
Ranganna G
see Channabasappa M N 145
Rao C Raghupathi
see Subrahmanyam P 202
Rao Rama K V S
see Phatak G M 243
Rao Venkateswara K
Reactivity of 2-hydroxy ω-nitroacetophenones : Synthesis of 2-oximinocoumaranones 238
Rishi Ram
see Tewari T N 65

Shankar J
see Phatak G M 243
Sharma L R
see Kalia Ramesh Kumar 119
Subrahmanyam P
A new relation between molar sound velocity and molar volume in carboxy acid solutions 202
Sudersanan M
Extraction of indium, cadmium and thallium by dinonylnaphthalene sulfonic acid 73
Sundaram A K
see Sudersanan M 73
Sundaram K M
Heat transfer to power-law fluids in thermal entrance region with viscous dissipation for constant heat flux conditions 50
Flow and heat transfer for a power-law electrically conducting fluid flowing between parallel plates under transverse magnetic field with viscous dissipation 188
Sundaram V
see Gopalan M A 126
Sundaramurthy V
see Rao Venkateswara K 238
Swaminathan G
Diffusivities of some organic amines in alcohols 101

Tak S S
see Bansal J L 1
Tewari T N
Anisotropic propagation of weak discontinuities in flows of thermally conducting and dissociating gases 65

Vasishta S K
Multiple integrals involving the H-function of two variables 41

SUBJECT INDEX

Boundary layer in a magnetic field
Finite difference method of solution of unsteady magnetic hydrodynamic boundary layer equations in a natural convection 258

Catalytic effects of ligand buffer
Catalytic effects in reactions of chromium (III) —Part II : The role of excess ligand buffer in complexation of Cr(III) with some aminopolycarboxylic acids 243
Complexes absorption spectra of iodine
Investigation of the electronic absorption spectra of some pyridine derivatives iodine complexes 231

Convection in boundry layer
Finite difference method of solution of unsteady magnetic hydrodynamic boundary layer equations in a natural convection 258

Diffusion
Diffusivities of some organic amines in alcohols 101

Dipole radiation
Radiation from non-plannar dipole antenna in weakly ionised plasma with displaced feed points 81

Disassociating gases
Anisotropic propagation of weak discontinuities in flows of thermally conducting and disassociating gases 65

Elastic deformation
Large deflection of a semi-circular plate on elastic foundation under a uniform load 21
Large deflection of a heated semi-circular plate under stationary temperature distribution 167

Electronic absorption spectra
Investigution of the electronic absorption spectra of some pyridine derivatives iodine complexes 231

Extraction
Extraction of indium, cadmium and thallium by dinonylnaphthalene sulfonic acid 73

Fox's H-function
Some inequalities involving the Fox's H-function 33
Multiple integrals involving the H-function of two variables 41

Graphite electrode
Amperometric titrations using the tubular graphite electrode. Development of an automatic technique 119

Hammett equation
Application of Hammett equation to arylazopyrazoles 98

Heat transfer
Heat transfer to power-law fluids in thermal entrance region with viscous dissipation for constant heat flux conditions 50
Flow and heat transfer for a power-law electrically conducting fluid flowing between parallel plates under transverse magnetic field with viscous dissipation 188

H-function
Multiple integrals involving the H-function of two variables 41

Hydrodynamic flow
Viscous flow and temperature distribution in rotating annulus with suction and injection 126
Flow of viscous stratified fluid of variable viscosity past a porous bed 145
Flow and heat transfer for a power-law electrically conducting fluid flowing between parallel plates under transverse magnetic field with viscous dissipation 188

Hydrodynamic stability
Stability of an infinite horizontal layer of fluid with a spatial heat source in the presence of a magnetic field 11

Inequalities
Some inequalities involving the Fox's H-function 33

Integrodifferential equations
Behavioral relationships between two nonlinear integrodifferential equations 219

Integrodifferential equations, stability of solutions
Behavioral relationships between two nonlinear integrodifferential equations 219

Ionised plasma
Radiation from non-planar dipole antenna in weakly ionised plasma with displaced feed points 81

L-functions
The place of an identity of Ramanujan in prime number theory 156

Multiple integration
Multiple integrals involving the H-function of two variables 41

Oxidation
Structure-reactivity relationship in the oxidation of aryl aliphatic ketones by Ce^{IV} 211

Polarography
Application of Hammett equation to arylazopyrazoles 98

Prime number theory
The place of an identity of Ramanujan in prime number theory 156

Reactions of chromium catalytic effects
Catalytic effects in reactions of chromium (III) —Part II : The role of excess ligand buffer in complexation of Cr(III) with some aminopolycarboxylic acids 243

Reactivity
Structure-reactivity relationship in the oxidation of aryl aliphatic ketones by Ce^{IV} 211
Reactivity of 2-hydroxy-ω-nitroacetophenones
Reactivity of 2-hydroxy-ω-nitroacetophenones : Synthesis of 2-oximinocoumaranones 238

Shock waves
Anisotropic propagation of weak discontinuities in flows of thermally conducting and dissociating gases 65
Sound velocity
A new relation between molar sound velocity and molar volume in carboxy acid solutions 202
Stratified fluid
Flow of viscous stratified fluid of variable viscosity past a porous bed 145
Summation
On the relation of Cesàro summability to generalized $(F_{\alpha,a})$ summability 175
Surface tension
Measurement of surface and interfacial tension from the maximum pressure in sessile and pendant bubbles and drops 107
Synthesis of 2-oximinocoumaranones
Reactivity of 2-hydroxy-ω-nitroacetophenones : Synthesis of 2-oximinocoumaranones 238

Temperature distribution
Temperature distribution in a laminar plane wall jet 1
Heat transfer to power-law fluids in thermal entrance region with viscous dissipation for constant heat flux conditions 50
Viscous flow and temperature distribution in rotating annulus with suction and injection 126
Large deflection of a heated semi-circular plate under stationary temperature distribution 167
Thermal conduction
Anisotropic propagation of weak discontinuities in flows of thermally conducting and dissociating gases 65
Titration
Amperometric titrations using the tubular graphite electrode. Development of an automatic technique 119

Univalent functions
Convex hull and extreme points of two families of univalent functions 138

Wave propagation
A new relation between molar sound velocity and molar volume in carboxy acid solutions 202

PROCEEDINGS OF THE INDIAN ACADEMY OF SCIENCES

Section 'A', Vol. 83, January-June 1976

CONTENTS

Temperature distribution in a laminar plane wall jet — *J. L. Bansal and S. S. Tak* — 1

Stability of an infinite horizontal layer of fluid with a spatial heat source in the presence of a magnetic field — *S. P. Bhattacharyya and S. K. Jain* — 11

Large deflection of a semi-circular plate on elastic foundation under a funiform load — *S. Datta* — 21

Some inequalities involving the Fox's H-function — *R. K. Raina and C. L. Koul* — 33

Multiple integrals involving the *H*-function of two variables — *S. K. Vasishta and S. P. Goyal* — 41

Heat transfer to power-law fluids in thermal entrance region with viscous dissipation for constant heat flux conditions — *K. M. Sundaram and G. Nath* — 50

Anisotropic propagation of weak discontinuities in flows of thermally conducting and dissociating gases — *T. N. Tewari, Madhukar Gaur and Rishi Ram* — 65

Extraction of indium, cadmium and thallium by dinonylnaphthalene sulfonic acid — *M. Sudersanan and A. K. Sundaram* — 73

Radiation from non-planar dipole antenna in weakly ionised plasma with displaced feed points — *Prem Swarup Bhatnagar* — 81

Application of Hammett equation to arylazopyrazoles — *Wahid U. Malik and R. N. Goyal* — 98

Diffusivities of some organic amines in alcohols — *G. Swaminathan and G. S. Laddha* — 101

Measurement of surface and interfacial tension from the maximum pressure in sessile and pendant bubbles and drops — *S. Ramakrishnan, K. Mailliet and S. Hartland* — 107

Amperometric titrations using the tubular graphite electrode. Development of an automatic technique — *Ramesh Kumar Kalia, Vijay Khanna, Jatinder Dutt and L. R. Sharma* — 119

Viscous flow and temperature distribution in rotating annulus with suction and injection — *M. A. Gopalan and V. Sundaram* — 126

Convex hull and extreme points of two families of univalent functions — *Mostafa A. Nasr* — 138

Flow of viscous stratified fluid of variable viscosity past a porous bed — *M. N. Channabasappa and G. Ranganna* — 145

The place of an identity of Ramanujan in prime number theory — *R. Balasubramanian and K. Ramachandra* — 156

Large deflection of a heated semi-circular plate under stationary temperature distribution — *Paritosh Biswas* — 167

On the relation of Cesàro summability to generalized ($F_{a',q}$) summability
C. T. Rajagopal 175

Flow and heat transfer for a power-law electrically conducting fluid flowing between parallel plates under transverse magnetic field with viscous dissipation
K. M. Sundaram and G. Nath 188

A new relation between molar sound velocity and molar volume in carboxy acid solutions
P. Subrahmanyam and C. Raghupathi Rao 202

Structure-reactivity relationship in the oxidation of aryl aliphatic ketones by Ce^{IV}
G. P. Panigrahi and Prafulla Kumar Misro 211

Behavioral relationships between two nonlinear integrodifferential equations
B. G. Pachpatte 219

Investigation of the electronic absorption spectra of some pyridine derivatives iodine complexes *Fawzy M. Abdel Kerim, F. A. Abou El-Fotouch and A. A. Mostafa* 231

Reactivity of 2-hydroxy-ω-nitroacetophenones: Synthesis of 2-oximinocoumaranones
K. Venkateswara Rao and V. Sundaramurthy 238

Catalytic effects in reactions of chromium (III)—Part II: The role of excess ligand buffer in complexation of Cr (III) with some aminopolycarboxylic acids
G. M. Phatak, K. V. S. Rama Rao and J. Shankar 243

Finite difference method of solution of unsteady magnetic hydrodynamic boundary layer equations in a natural convection *Sudhanshu K. Ghoshal and Abha Ghoshal* 258

PROCEEDINGS OF THE INDIAN ACADEMY OF SCIENCES

SECTION A

Vol. 84, July–December 1976

AUTHOR INDEX

Agrawal J K
Chronology of Mesozoic volcanics of India 157

Appala Raju N
see Reddy Y Krishna 71
see Hussain R C 144

Chakraborty B B
see Ranade M M 39

Chaturvedi K Kamal
see Jain Prabuddha 124

Chaturvedi M C
see Pathak S K 10

Chaubey H D
The Weierstrass-Jacobi transform

Deshpande R Ajit 219
Reaction of hexachloropropene with hydroxy-coumarins and chromones 85

Deshpande M R
see Iyer K N 129

Devi Y Uma
see Rao K S R Krishna Mohan 79

Garg O P
On recurrence relations for the *H*-Function of two variables 244

Goyal R N
see Malik U Wahid 35

Gupta S C
An inhomogeneity problem in couple stress theory 181

Hanumanthu P
Studies in the formation of heterocyclic rings containing nitrogen: Part XXIII. Condensation of *o*-aminobenzamide with aldehydes and Schiff bases 57

Hussain R C
2-Hydroxy-1-acetonaphthoneoxime as analytical reagent: Part I. Gravimetric determination of copper 144

Iyer K N
The equatorial anomaly in ionospheric total electron content and the equatorial electrojet current strength 129

Jain N C
Detection of alkoxy-complexes using visual indicators in non-aqueous solvents 98

Jain Prabuddha
Coordination compounds of Cu(II), Ni(II) and Co(II) with sulphamethazine-5-bromo-salicylaldimine 124

Kalia R K
see Ram Parkash 64

Koul C L
On certain double integrals 218

Madan R L
Morphological studies of tin oxide gel 214

Malik U Wahid
A report on polarography of nitro derivatives of arylazopyrazoles 35

Meera S Kamath
see Merchant J R 139

Mehrotra R C
see Jain N C 98

Merchant J R
see Deshpande R Ajit 85
Cyanoethylation of methyl and ethyl ethers of dimethylphenols 139

Mishra Shankar Prasad
Oscillatory free convection flow of a second order fluid from a vertical plate 20
Combined free and forced convection effects on the Magnetohydrodynamic flow through a porous channel 257

Muduli Jugal Charan
see Mishra Shankar Prasad 257

Murty A S R Krishna
see Rao V Pandu Ranga 150

Narayanan C V
Polarography of molybdenum in phosphoric acid medium 91

Nath G
Nonsimilarity solutions of a class of free convection problems 114

Pachpatte B G
On some nonlinear generalizations of Gronwall's inequality 1

Panda Tarini Charan
see Mishra Shankar Prasad 20

Pathak R S
see Chaubey H D 219

Pathak S K
Magneto-hydrodynamic stability of plane Poiseuille flow with flexible boundaries 10

Pillai K Krishna
see Rao M Kanakalingeswara 210

Rai A K
see Jain N C 98

Raina R K
see Koul C L 218

Rajagopal S
see Rao M Kanakalingeswara 210

Rama
see Agrawal J K 157

Ram Autar
Generalized inaccuracy and a coding theorem 204

Ram Parkash
Polarographic reduction of nitrophenols and nitro-anilines in aqueous tetrahydrofuran 64

Ranade M M
Effect of discontinuity in density and conductivity on the hydromagnetic stability of a two-dimensional jet 39

Rao Kaza Somasekhara
Determination of lead by the precipitation of lead molybdate from a homogeneous solution by the diffusion method 52

Rao K S R Krishna Mohan
A study of the Mannich reaction in the isoxazole series 79

Rao M Kanakalingeswara
Synthesis of linear diphenyl furanocoumarins 210

Rao N V Subba
see Hanumanthu P 57

Rao S Brahmaji
see Reddy Y Krishna 71

Rao V Pandu Ranga
Studies on the extraction of vanadium (IV) in the presence of some anions and neutral oxygen donors 150

Rastogi R G
see Iyer K N 129

Ratnam C V
see Hanumanthu P 57

Reddy Y Krishna
Amperometric determination of copper with resacetophenone phenylhydrazone 71

Roy Tapas Ranjan
Numerical study of unsteady flow of a second order liquid past a porous infinite flat plate with uniform suction 250

Sandle N K
see Madan R L 214

Sarma V V
see Rao V Pandu Ranga 150

Seshavatharam S K V
see Hanumanthu P 57

Soni R S
see Ram Autar 204

Soundalgekar V M
Effects of mass transfer on free convective flow of a dissipative, incompressible fluid past an infinite vertical porous plate with suction 194

Sudersanan M
Study of indium complexes by solvent extraction and ion exchange 104

Sundaram A K
see Sudersanan M 104

Vaidya Vishnu Gopalarao
see Rao Kaza Somasekhara 52

Verma Ranjit Singh
see Ram Parkash 64

Yajnik S A
see Narayanan C V 91

SUBJECT INDEX

Alkoxides-double, titrimetric detection
Detection of alkoxy-complexes using visual indicators in non-aqueous solvents 98

Appell's function
On certain double integrals 235

Bivalent metals
Coordination compounds of Cu (II), Ni (II) and Co (II) with sulphamethazine-5-bromo-salicylaldimine 124

Carboxylic acids
Study of indium complexes by solvent extraction and ion exchange 104

Chronology
Chronology of Mesozoic volcanics of India 157

Code length
Generalised inaccuracy and a coding theorem 204

Complexes-alkoxy
Detection of alkoxy-complexes using visual indicators in non-aqueous solvents 98

Complexes with hydroxy
Study of indium complexes by solvent extraction and ion exchange 104

Convection effects
Combined free and forced convection effects on the magnetohydrodynamic flow through a porous channel 257

Copper amperometry
Amperometric determination of copper with resacetophenone-phenylhydrazone 71

Copper gravimetry
2-Hydroxy-1-acetonaphthoneoxime as analytical reagent: Part I. Gravimetric determination of copper 144

Couple stress Hivert theory
An inhomogeneity problem in couple stress theory 181

Deccan, Rajmahal troops
Chronology of Mesozoic volcanics of India 157

Dichlorobenzodipyrandioues
Reaction of hexachloropropene with hydroxy-coumarins and chromones 85

Entropy
Generalized inaccuracy and a coding theorem 204

Extraction, vanadium (IV) complexes
Studies on the extraction of vanadium (IV) in the presence of some anions and neutral oxygen donors 150

Finite conductivity
Effect of discontinuity in density and conductivity on the hydromagnetic stability of a two-dimensional jet 39

Flow with flexible boundaries
Magneto-hydrodynamic stability of plane Poiseuille flow with flexible boundaries 10

Free convection
Nonsimilarity solutions of a class of free convection problems 114
Effect of mass transfer of free convection flow of a dissipative, incompressible fluid past an infinite vertical porous plate with suction 194

Generalized coding theorem
Generalized inaccuracy and a coding theorem 204

Generalized inaccuracy
Generalized inaccuracy and a coding theorem 204

Gondwana dykes
Chronology of Mesozoic volcanics of India 157

Gronwall-Bellman inequality
On some non-linear generalizations of Gronwall's inequality 1

Harmonic functions
The Weierstrass-Jacobi transform 219

H-function
On recurrence relations for the *H*-function of two variables 244

Heat transfer
Nonsimilarity solutions of a class of free convection problems 114

Homogeneous precipitation
Determination of lead by the precipitation of lead molybdate from a homogeneous solution by the diffusion method 52

Hydromagnetic stability
Effect of discontinuity in density and conductivity on the hydromagnetic stability of a two dimensional jet 39

2-Hydroxy-1-acetonapthoneoxime
2-Hydroxy-1-acetonaphthoneoxime as analytic reagent: Part I. Gravimetric determination of copper 144

Indicators, visual
Detection of alkoxy-complexes using visual indicators in non-aqueous solvents 98

Inhomogeneity problem
An inhomogeneity problem in couple stress theory 181

Integral inequalities
On some nonlinear generalizations of Gronwall's inequality 1

Inversion representation theorems
The Weierstrass-Jacobi transform 219

Ion exchange
Study of indium complexes by solvent extraction and ion exchange 104

Isoxazole
A study of the Mannich reaction in the isoxazole series 79

Jacobi
Difference operator
The Weierstrass-Jacobi transform 219
Polynomials
The Weierstrass-Jacobi transform 219
Transforms
The Weierstrass-Jacobi transform 219

Lead molybdate
Determination of lead by the precipitation of lead molybdate from a homogeneous solution by the diffusion method 52

Mannich reaction
A study of the Mannich reaction in the isoxazole series 79

Mass transfer
Effects of mass transfer on free convection flow of a dissipative, incompressible fluid past an infinite vertical porous plate with suction 194

MHD stability
Magneto-hydrodynamic stability of plane Poiseuille flow with flexible boundaries 10

Molybdenum
Polarography of molybdenum in phosphoric acid medium 91

Morphology
Morphological studies of tin oxide gel 214

N-arylideneorthanilamides
Studies in the formation of heterocyclic rings containing nitrogen: Part XXIII. Condensation of *o*-aminobenzamide with aldehydes and Schiff bases 57

Nitroanilines
Polarographic reduction of nitrophenols and nitroanilines in aqueous tetrahydrofuran 64

Nitrophenols
Polarographic reduction of nitrophenols and nitroanilines in aqueous tetrahydrofuran 64

Nonlinear generalization
On some nonlinear generalizations of Gronwall's inequality 1

Nonsimilarity solutions
Nonsimilarity solutions of a class of free convection problems 114

Oscillatory free convection
Oscillatory free convection flow of a second order fluid from a vertical plate 20

Phosphoric acid
Polarography of molybdenum in phosphoric acid medium 91

Plane Poiseuille flow
Magneto-hydrodynamic stability of plane Poiseuille flow with flexible boundaries 10

Polarographic reduction
Polarographic reduction of nitrophenols and nitroanilines in aqueous tetrahydrofuran 64

Polarography
A report on polarography of nitro derivatives of arylazopyrazoles 35

Polarography
Polarography of molybdenum in phosphoric acid medium 91

Pyrazoles
A report on polarography of nitro derivatives of arylazopyrazoles 35

Resacetophenone phenylhydrazone
Amperometric determination of copper with resacetophenonephenylhydrazone 71

Second order visco-elastic liquid
Numerical study of unsteady flow of a second order liquid past a porous infinite flat plate with uniform suction 250

Solvent extraction
Study of indium complexes by solvent extraction and ion exchange 104

Sulphadiazines
Coordination compounds of Cu (II), Ni (II) and Co (II) with sulphamethazine-5-bromo-salicylaldimine 124

Synthesis of indan-1-ones
Cyanoethylation of methyl and ethyl ethers of dimethylphenols 139

Tetragonal
Morphological studies of tin oxide gel 214

The *H*-function, two variables
On certain double integrals 235

The *H*-function, one variable
On certain double integrals 235

Tin oxide gel
Morphological studies of tin oxide gel 214

Two dimensional jet
Effect of discontinuity in density and conductivity on the hydromagnetic stability of a two-dimensional jet 39

Two-dimensional unsteady
Numerical study of unsteady flow of a second order liquid past a porous infinite flat plate with uniform suction 250

Two variables
On recurrence relations for the *H*-function of two variables 244

Weierstrass-Jacobi
The Weierstrass-Jacobi transform 219

PROCEEDINGS OF THE INDIAN ACADEMY OF SCIENCES

Section 'A', Vol. 84, July-December 1976

CONTENTS

On some nonlinear generalizations of Gronwall's inequality
B. G. Pachpatte 1

Magneto-hydrodynamic stability of plane Poiseuille flow with flexible boundaries
S. K. Pathak and M. C. Chaturvedi 10

Oscillatory free convection flow of a second order fluid from a vertical plate
Shankar Prasad Mishra and Tarini Charan Panda 20

A report on polarography of nitro derivatives of arylazopyrazoles
Wahid U. Malik and R. N. Goyal 35

Effect of discontinuity in density and conductivity on the hydromagnetic stability of a two-dimensional jet
M. M. Ranade and B. B. Chakraborty 39

Determination of lead by the precipitation of lead molybdate from a homogeneous solution by the diffusion method
Somasekhara Rao Kaza and Vishnu Gopalrao Vaidya 52

Studies in the formation of heterocyclic rings containing nitrogen: Part XXIII. Condensation of *o*-aminobenzamide with aldehydes and Schiff bases
P. Hanumanthu, S. K. V. Seshavatharam, C. V. Ratnam and N. V. Subba Rao 57

Polarographic reduction of nitrophenols and nitroanilines in aqueoustetrahydrofuran
Ram Parkash, R. K. Kalia and Ranjit Singh Verma 64

Amperometric determination of copper with resacetophenone phenylhydrazone
Y. Krishna Reddy, S. Brahmaji Rao and N. Appala Rao 71

A study of the Mannich reaction in the isoxazole series
K. S. R. Krishna Mohan Rao and Y. Uma Devi 79

Reaction of hexachloropropene with hydroxy-coumarins and chromones
Ajit W Deshpande and J. R. Merchant 85

Polarography of molybdenum in phosphoric acid medium
C. V. Narayanan and S. A. Yanjik 91

Detection of alkoxy-complexes using visual indicators in non-aqueous solvents
N. C. Jain, A. K. Rai and R. C. Mehrotra 98

Study of indium complexes by solvent extraction and ion exchange
M. Sudersanan and A. K. Sundaram 104

Nonsimilarity solutions of a class of free convection problems
G. Nath 114

Coordination compounds of Cu(II), Ni(II) and Co(II) with sulphamethazine-5-bromo-salicylaldimine
Prabuddha Jain and Kamal K. Chaturvedi 124

The equatorial anomaly in ionospheric total electron content and the equatorial electrojet current strength
K. N. Iyer, M. R. Deshpande and R. G. Rastogi 129

Cyanoethylation of methyl and ethyl ethers of dimethylphenols
J. R. Merchant and Meera S. Kamath 139

2-Hydroxy-1-acetonaphthoneoxime as analytical reagent: Part I. Gravimetric determination of copper *R. C. Hussain and N. Appala Raju* 144

Studies on the extraction of vanadium (IV) in the presence of some anions and neutral oxygen donors
V. Pandu Ranga Rao, V. V. Sarma and A. S. R. Krishna Murthy 150

Chronology of Mesozoic volcanics of India *J. K. Agrawal and Rama* 157

An inhomogeneity problem in couple stress theory *S. C. Gupta* 181

Effects of mass transfer on free convective flow of a dissipative, incompressible fluid past an infinite vertical porous plate with suction
V. M. Soundalgekar 194

Generalized inaccuracy and a coding theorem
Ram Autar and R. S. Soni 204

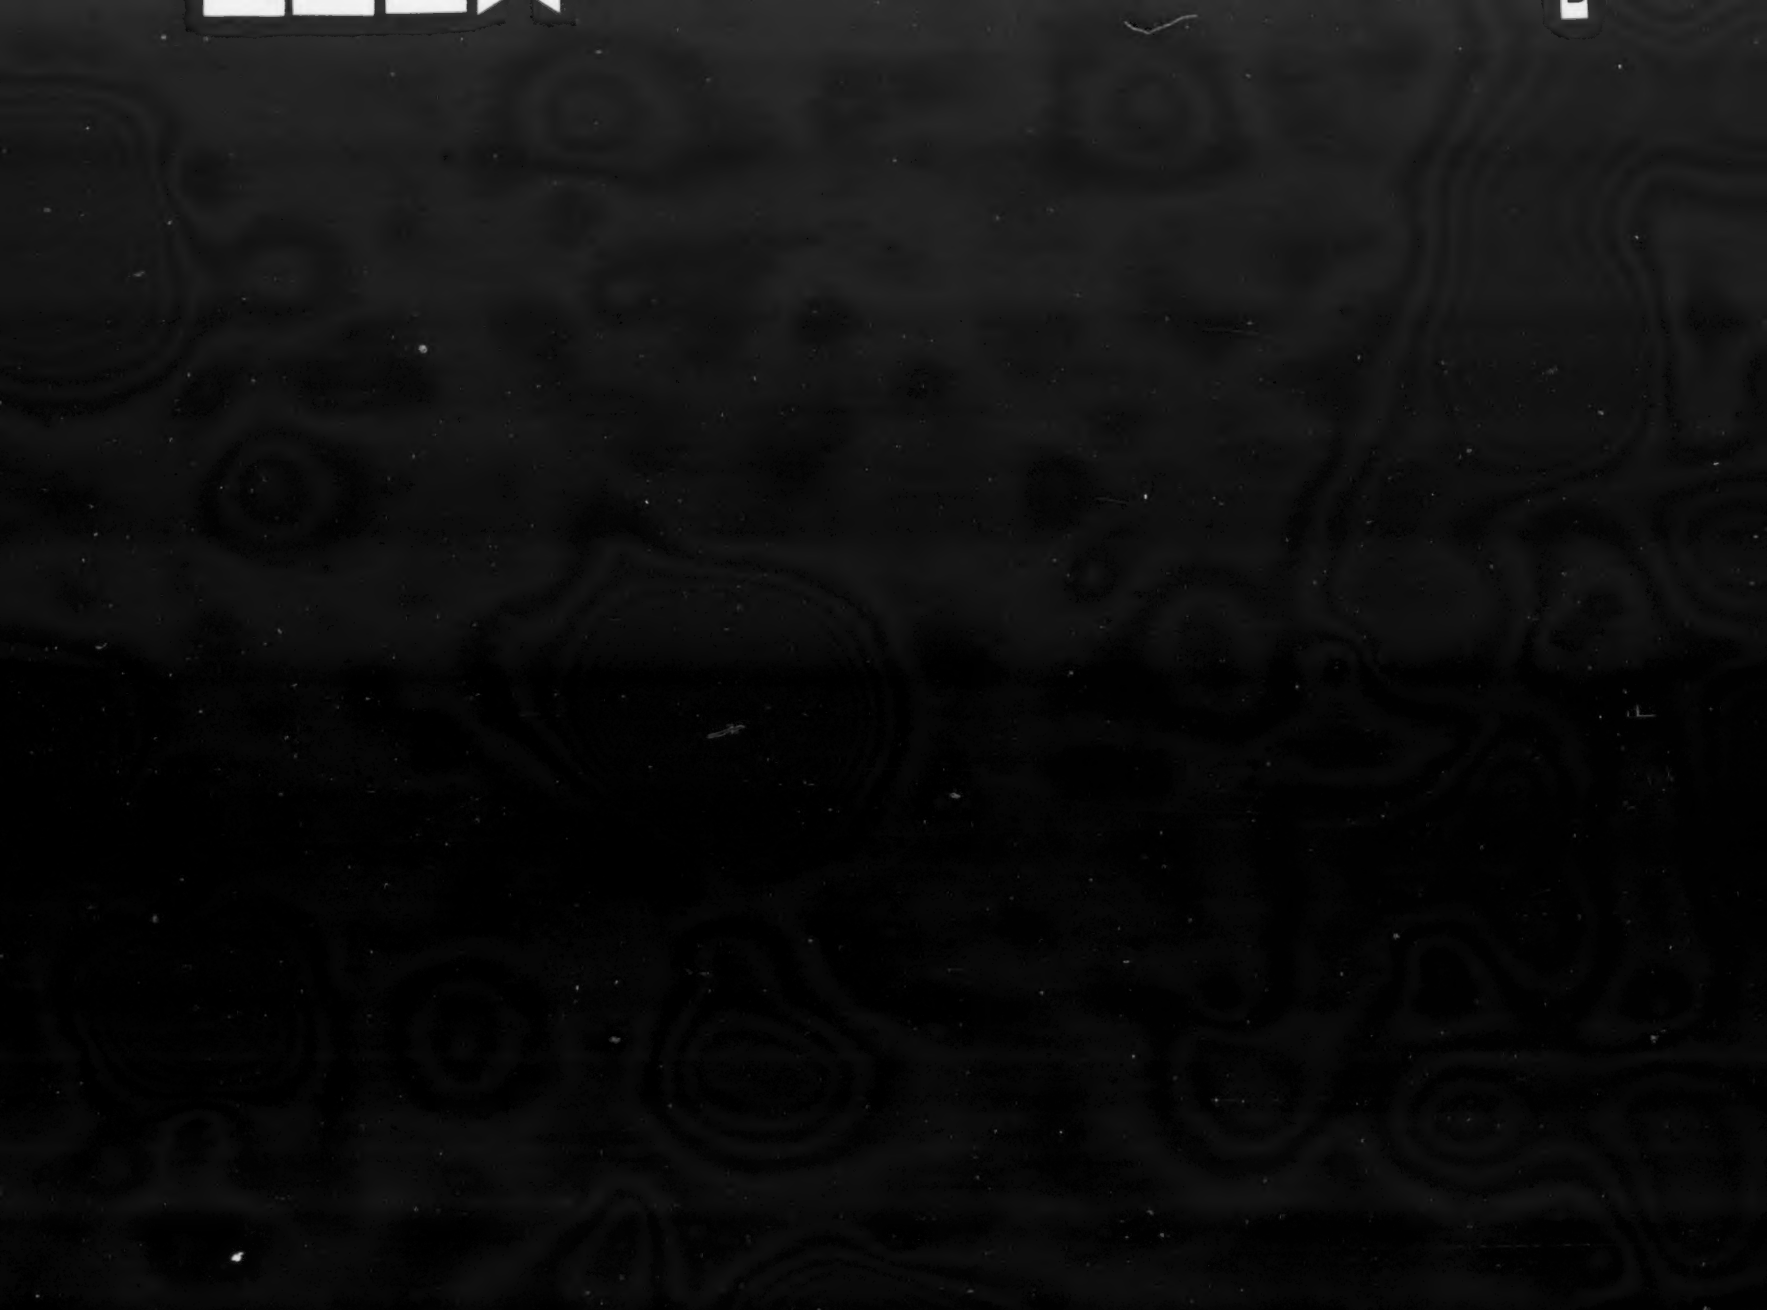
Synthesis of linear diphenyl furanocoumarins
M. Kanakalingeswara Rao, K. Krishna Pillai and S. Rajagopal 210

Morphological studies of tin oxide gel *R. L. Madan and N. K. Sandle* 214

The Weierstrass-Jacobi transform *H. D. Chaubey and R. S. Pathak* 219

On certain double integrals *C. L. Koul and R. K. Raina* 235

On recurrence relations for the *H*-function of two variables *O. P. Garg* 244

Numerical study of unsteady flow of a second order liquid past a porous infinite flat plate with uniform suction *Tapas Ranjan Roy* 250


Combined free and forced convection effects on the magnetohedrodynamic flow through a porous channel
Shankar Prasad Mishra and Jugal Charan Muduli 257
